

Regal Eagle Review

VOLUME 70

SEPTEMBER 2022

Migrating Fun Facts

Each year groups of certain animals move from one place to another.

Some may travel thousands of miles in the spring and then thousands of miles back in the fall. These long trips are called migrations. Below are some fun facts about animals that migrate across the land, air, and sea.

*The average arctic tern will travel the equivalent of going around the earth 60 times in their lifetime.

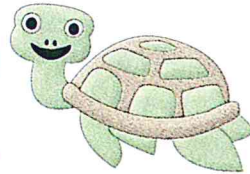

*Birds save energy and are able to travel great distances by riding the air currents.

*Male and female walrus migrate in separate herds.

*Sea turtles migrate back to the same beach where they were born to lay their eggs.

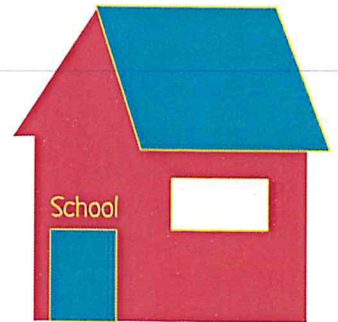

*Each year Canadian geese fly south for the winter to avoid the winter freeze of lakes and ponds. Then they return to the north for the summer where they breed and nest. Geese are known for their V formation when they fly. This helps them to save energy and allows them to fly up to 600 miles per day.

Regal Eagle Making the Grade Drawing

Remember to bring in your latest report card for entries into the drawing. Each "A" gets 2 entries and each "B" gets 1 entry. The winning ticket will receive a \$25 deposit to their savings. Our next drawing will be October 18, 2022.

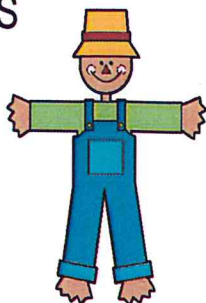

congratulations

to our latest
winner:

Much

JUST FOR LAUGHS

Q: Why was the scarecrow given the Nobel Prize?

A: Because he was out-standing in his field!

Q: Why are ghosts so bad at lying?

A: Because you can see right through them!

BOO!

"Witch" color will you choose to color your witch?

What does a witch ask for when she goes to a hotel?

Broom Service!
